

Barclays Virtual Taster Course: Data Analytics

Digital Workbook

Virtual Taster Course: Data Analytics Workbook

Brief

Now that you've read over the supporting materials, have a go at the following questions. Good luck!

1. Which was the busiest period/which saw the most incidents?

The busiest day was 18/07/2022 with 4 incidents (2 toolbar issue and 2 distorted audio issue) across locations followed by 22/07/2022 (1 headset, 1 system crash and 1 call quality issue) and 16/07/2022 (all call quality issue) in tie with 3 incidents across locations.

2. Which category of incidents had the highest volume?

The category with the highest volume of incidents was Call Quality issues with 5 incidents, 3 incidents being on the 16/07/2022 across locations.

Distorted Audio was next with 4 incidents, 2 incidents being on the 18/07/2022 with 2 being experienced by Isaac Cohen.

3. Were there any repeat offenders (agents reporting incidents more than once?)

Issac Cohen experienced 3 issues, 2 of which were Distorted Audio followed by System Crash all in Newcastle upon Tyne.

Zara Khan was next with 2 issues, 1 System Crash and 1 Call Quality issue. Both at different locations (London and Bristol).

Using the raw data, we would like you to create a stacked bar chart showing the volume and type of incidents per location.

Please create your stacked bar chart in a separate document and **upload in the submissions section**.
